

Generated design hypergraphs — star-expanded (base points + block hubs)

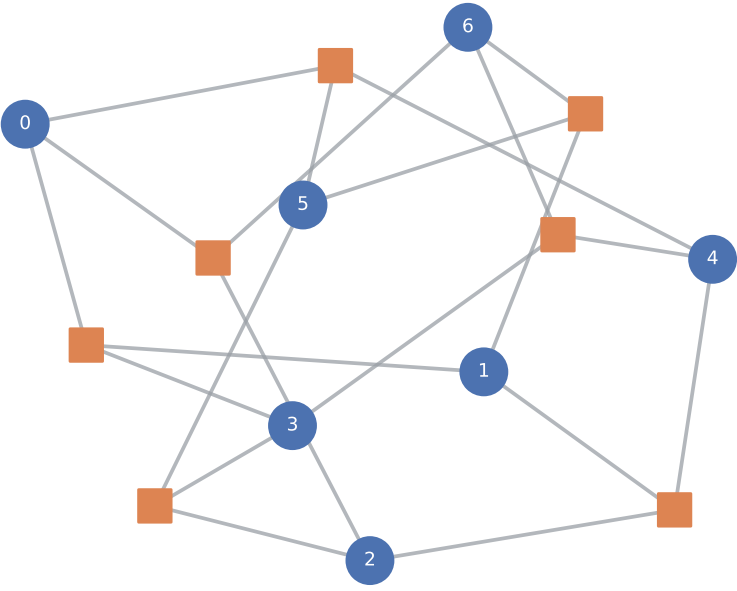

chain (k=2-uniform)
9 points

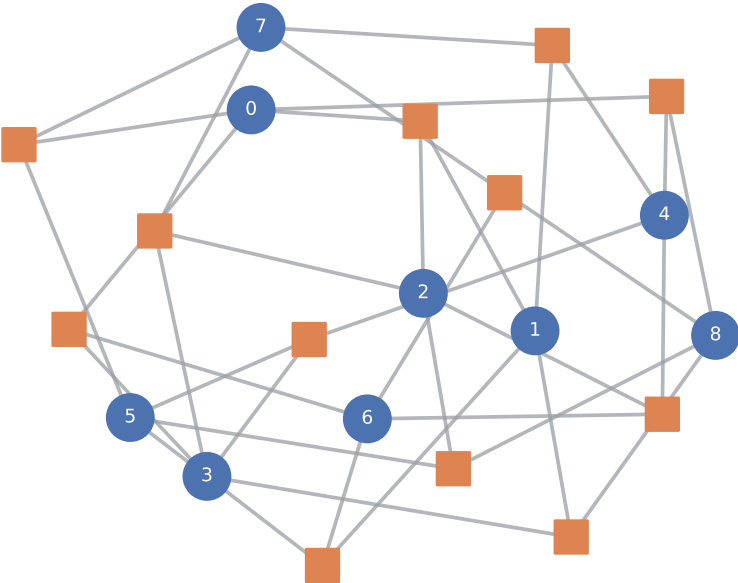

k-uniform k=3
9 points, 8 blocks

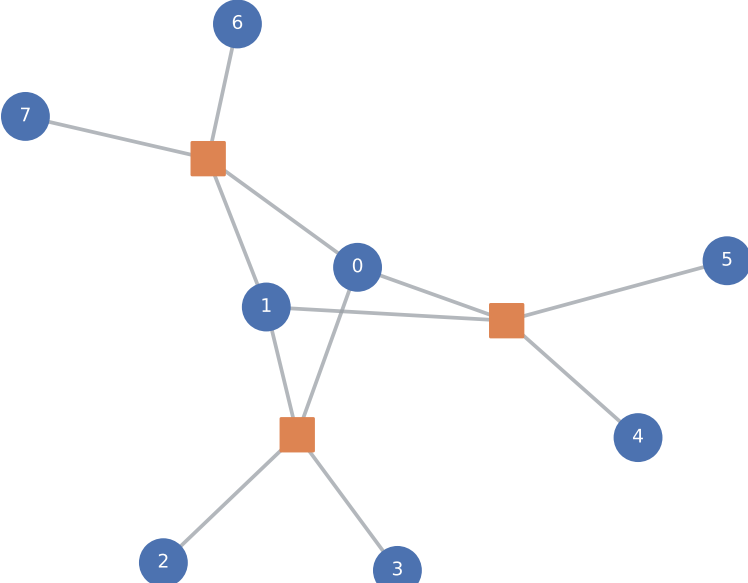

Fano $S(2,3,7) = PG(2,2)$
projective, 7 points 7 lines

Steiner $S(2,3,9) = AG(2,3)$
affine, 9 points 12 lines

sunflower
shared core + disjoint petals

- generated design hypergraphs
- base point
 - block hub (a hyperedge / design line)
 - point-block incidence
